DESIGN & PRINT

Business Cards

Business cards are often the marketing tool a customer will receive from you. It is essential to make the correct impression by presenting a professional Business Card. Standard Size 90mm x 50mm - We specialise in printing 500 cards Full colour with UV coating.

Flyers

Flyers remain one of the most popular methods of marketing certain products and services. At the most cost effective rates.

All standard sizes available - A6, A5 and A4

CERAMIC PRO
Ceramic Nanotechnology

PROTECTIVE COATING FOR ALL **Automotive** SURFACES

CERAMIC PRO
Nanotechnology as a lifestyle

- WATER REPELLENT RESISTANCE
- SOLVENT RESISTANCE
- UV RESISTANCE
- SCRATCH RESISTANCE
- INDUSTRIAL FALLOUT

Ceramic Pro is a SiO₂ Nanoceramic Glass Coating, the liquid forms into a 9H (pencil hardness) coating when applied onto the surface. The film forms with such properties such as: Super Hydrophobic Effect, High Scratch Resistance, Anti Graffiti, Corrosion Resistance, UV Resistance and High Temperature Resistance.

Ceramic Pro cannot be removed by chemicals once cured; it can only be removed by machine polishing.

Ceramic Pro has been officially tested by "SGS". SGS is the world's leading inspector, verifier, testing and certification company.

Advanced 9H Glass Coating

Rim Protection

Protection for Mag Wheels

We believe we have the best product in the world to combat every motorist's nightmare – scuffed and rashed, mag and alloy wheels, from hitting the kerb, and we are sure that our customers will be delighted at being able to purchase a quality product to protect their mags and alloys, which also enhances the look of their vehicle.

RimPro-Tec™ has been designed and developed as a two piece product this design effectively provides a seamless joint that has no weak joint once the base and inner are clipped together.

RimPro-Tec™ retail kits fit 4 x Wheels from a size 12" up to a size 22". Designed for the inner to rotate within the base to distribute the energy of the impact away from your wheel when kerbing takes place.

Signage, Window Graphics, Stickers & Labels

Corex Boards (Estate Agent Boards), Cromodeck Boards & ABS Boards.

We also do Window Graphics

Invisible Windshield Protection

When Diamon-Fusion is applied to a vehicle windscreen:

- Reduces night glare by 35%
- Windscreens are 10 x more resistant to damage
- Improved impact and scratch resistance
- Reduces chips and cracks
- Scientifically proven windscreen protection
- Revitalization to maintain 'like new' performance, if desired, is easy and effective
- 10 x more water repellent
- Is UV stable
- Is 100% optically clear
- Is military-grade
- Increased vision and reaction time, at 60km/h, university studies prove our hydrophobic coating can give you an extra 17.8m of prevention (1 full second of reaction time)
- Resists pitting and etching so well that the U.S. Army applied it on Humvees to prevent damage from blowing and sand in harsh environments
- Repels mud, snow and ice, insect impacts and anything else that can get splattered on your windscreen.
- University and military studies prove that Diamon-Fusion reduces the amount of damage a windscreen experiences from flying debris. This is important because a damaged windscreen can compromise the safety of your vehicle in several ways. Preventing that damage from occurring by having Diamon-Fusion applied will improve the safety of you and your passengers and will reduce the likelihood that you will have to endure the cost, time and hassles of replacing or repairing your or windscreen.

PROTECT YOUR CAR.
IN STYLE.

PROTECT HIGH
IMPACT AREAS

- High Gloss
- Crystal Clear
- Durable
- Petrol Resistant
- Waxable
